# Defining and Managing Market status

By: Fred Mac Donald
Sunday, 13th October 2013

Marketing Status is used to show the Status this property has in the Market Place

By Defaults we have the following defined

- Available
- Sold
- Subject to Contract
- Under Contract
- Under Offer

To manage these log in and navigate to the Administration Section **»** Dashboard **»** Manage Property **»** Market Status Type

This is a simple screen to change the type or add a new type.
