XMS Systems Default Pages and what they are used for

By: Fred Mac Donald
Tuesday, 17th May 2016

I have noticed that as a website grows and develops over time, the owner and myself gets confused with what pages does what in XMS Systems.

I have also noticed that in some cases the wrong page is used for the wrong purpose with the result that the website doesn't look/work they way it should.

Here is a list of the pages with a short description of what they do. Depending on your specific configuration you might not have all of them. The number will still be the same no matter what your configuration. In some cases the "content" part of the page is not used on the front end.

1. **Home Page**
   The default page a site visitor is likely to arrive at your site on.
2. **Contact Us Page**
   The contact us page with the contact form. The configuration section is used to define "contact departments" with associated email addresses. Your company physical details can be added via a "nugget" and there is no need to type it into the page. Search Engines will look for this page on your website.
   An important tip here is to never type your email address out visually. Makes it so much easier for scrapers to find you address and sell it to some spammer.
3. **Login Page** (Not used)
4. **Registration Page**
   The page used to register members with your website.
5. **Member Home Page**
   This page is the default page displayed to the members when they are in their "personal" space on the website.
6. **News Letters**
   List of your published news letters.
   This is also a good place to add your "subscribe for newsletter" link
7. **Forgot Password Page**
   Simple page to allow users to retrieve their passwords
8. **About Us**
   Your company background and short summary of what is is you are doing. Search Engines will look for this page on your website.
9. **Suspended Account**
   The page a suspended member will be redirected to if the try and log in after admin set their status to suspended.
10. **Mail Sent Thanks**
    Displayed after someone send a message via the contact us page and any of the "contact us" buttons on the shop and tour modules
11. **Photo Gallery**
    Page with a list of your image galleries
12. **View photos**
    Page displaying the images in a specific gallery. Content section not used in this page
13. **Scheduled Events**
    List of items pulled in from the calendar and displayed in list format
